Logic File for Survey # [626252]: Open Science Survey 2019

Description:	
	Welcome to the Open Science Survey 2019,

Welcome:	This is a survey for doctoral and postdoctoral researchers of the Max Planck Society. The survey aims at providing a descriptive picture of the **knowledge, attitudes, need and implementation of Open Science Practices** of research fellows of the Max Planck Society.
	Please take your time to carefully read the following terms and conditions regarding data protection and usage:
	The data you provide in this survey will only be evaluated and presented in an aggregated and anonymized form. All the data collected comply with the General Data Protection Regulation (GDPR). It is not possible to identify you at any moment, as long as you refrain from providing personal data.
	The aggregated and anonymized data will be shared with the PhDnet Steering Group, the Max Planck Digital Library and the Max Planck General Administration. The External PhD Representatives will be informed about when the final survey report is online and where it can also be downloaded by all researchers of the Max Planck Society. In addition, the anonymized data will potentially become openly available through its publication in scientific journals that endorse Open Access standards.
	The survey is hosted on LimeSurvey with restricted access provided by the Max Planck Society. Participating in the survey is possible via a unique token generating system. If you stop participating in the survey before completion, the collected data will be automatically deleted.
	The survey will take about **10 to 15 minutes** to complete. It is divided in three different sections covering questions about different scientific practices, the local resources and support you have at your Institute, and some demographic information.
	Your participation in this survey is **voluntary** and you may not directly benefit from it. However, this survey will potentially offer diagnostic information and further insight for the improvement of the Max Planck Society in terms of scientific practices. You will be able to access the report of its results, which will be made available at the end of 2019 at https://www.phdnet.mpg.de/home.
	If you have questions, or wish to report technical issues, you can reach any of the following members of the PhDnet Open Science Working Group:
	Isabell Tunn - isabell.tunn@mpikg.mpg.de **Daniel Toribio-Florez** - toribio-florez@coll.mpg.de
	If you click "Next", you accept the terms and conditions listed above, as well as the use of the provided data in case you complete the survey.
	Thank you in advance for your participation!
End message:	**All your answers have been successfully submitted!**
	Thank you for participating in the Open Science Survey 2019!
	The final report will be made available at the end of 2019 at https://www.phdnet.mpg.de/home. If you have questions, or wish to report technical issues, you can reach any of the following members of the PhDnet OpenScience Working Group:
	Isabell Tunn - isabell.tunn@mpikg.mpg.de Daniel Toribio-Florez - toribio-florez@coll.mpg.de
	BEFORE YOU LEAVE US...

As part of this survey, we finally want to inform you about the different ways in which the Max Planck Society promotes Open Science through the active role of the Max Planck Digital Library (MPDL) team.

In the MPDL website (https://www.mpdl.mpg.de/en/), you can access information about multiple Open Science initiatives supported by the Max Planck Society and a service catalogue consisting of an exhaustive list of tools useful in the process of open access publication. The list contains information on how to deal with scientific information gathering, network build up, and data and tasks management.

Among the different initiatives…

- SCOAP3 (https://scoap3.org/) the international Open Access initiative.

- The Open Access community building process (https://openaccess.mpg.de/) that was initiated with the Berlin Declaration in 2003 (https://openaccess.mpg.de/Berliner-Erklaerung) by the President of the MaxPlanck Society.

- And the eScience conferences "Open Science Days (https://osd.mpdl.mpg.de/)".

Within the service/tools catalogue…

- Under ReNa (https://rena.mpdl.mpg.de/journals/oagold/), one could also find a list of journals where Max Planck authors can publish open access free of charge. The list contains more than 5000 entries, and covers all fields of science, encompassing agreements between the MPS and numerous journals from different countries.

- There is Edmond (https://edmond.mpdl.mpg.de/imeji/), an open access research data depository.

- And keeper (https://keeper.mpdl.mpg.de/accounts/login/?next=/), to store and share data during your research

- Labfolder (https://labfolder.mpdl.mpg.de/home/) is a digital lab notebook to create optimal transparency of your research.

- The list contains many more entries and several for specific fields of research.

Outside the MPDL there are several resources that might also be of interests to you…

- If you want to keep the copyrights of your own work in a non-open access journal you can try the SPARC Author Addendum (https://sparcopen.org/our-work/author-rights/brochure-html/).

- SHERPA RoMEO (http://www.sherpa.ac.uk/romeo/faq.php?la=en&fIDnum=%7C&mode=simple) is a database on publisher's open access and open archiving policies.

- In OpenAire explore (https://explore.openaire.eu/) you can explore and find open publications, data, software etc.

- ThinkCheckSubmit (https://thinkchecksubmit.org/) helps you identify predatory journals and conferences.

#	Name [ID]	Relevance [Validation] (Default value)	Text [Help] (Tip)
G-0	**Introduction** [GID 9965 (/admin/questiongroups/sa/view/surveyid/626252/gid/9965)]	1	
Q-0	**Introduction** [QID 131813 (/admin/questions/sa/view/surveyid/626252/gid/9965/qid/131813)] Text display [X]	1	Before getting started, we want to give you some background information regarding the purpose of

the present Survey on Scientific Practices and Open Access.

The newly founded Open Science Working Group of the PhDnet is interested in assessing the stance of the Max Planck Society regarding different scientific practices related to open access. As individual researchers and as a
research organization, it is important to know where we stand in order to plan where to go. Therefore, this survey is intended to provide a global picture of the attitudes that researchers across the Max Planck Society hold towards different Open Access practices.

Beyond its descriptive purpose, the survey will offer further insight for the improvement of the Max Planck Society in terms of these scientific practices, with potential implications for the rest of the academic community insofar as the Max Planck Society conforms a highly representative sample of researchers.

In order to accomplish this collective goal, we kindly ask you to be as honest and precise as possible when responding to the survey.

G-1	**SECTION 1 - OPEN SCIENCE PRACTICES** [GID 9968 (/admin/questiongroups/sa/view/surveyid/626252/gid/9968)]	1	
Q-1	**QID01** [QID 131816 (/admin/questions/sa/view/surveyid/626252/gid/9968/qid/131816)] Text display [X]	1	In this section, we want to know your opinion about different scientific practices related to Open Science. In the following pages, you will be presented with a brief description of a specific scientific practice and a few questions related to it. Please, carefully read the description and answer the questions that follow.
G-2	**Open Access Publications** [GID 9944 (/admin/questiongroups/sa/view/surveyid/626252/gid/9944)]	1	**Definition:** Unrestricted public availability of a research paper on the internet through formal publication systems (e.g. Open Access Publishers) or author self-archiving (e.g. working papers or pre-prints in online repositories).
Q-2	**Instr1** [QID 131819 (/admin/questions/sa/view/surveyid/626252/gid/9944/qid/131819)] Text display [X]	1	**Now that you have read the definition, please answer the following questions:**
Q-3	***P1Know** [QID 131702 (/admin/questions/sa/view/surveyid/626252/gid/9944/qid/131702)] Array [F]	1	To what extent...
